

It is the objective of the Cherokee County Board of Education to provide an educational program for its students through use of funds derived from local, state and Federal sources. It is the intent of the School Board to study all legislation with this philosophy in mind, selecting those particular parts of legislation which will help the School Board provide better educational opportunities and better physical and mental growth for each pupil.

The Superintendent will select and recommend any particular areas in which Federal money can assist and provide a better educational program. The Superintendent will be the designated person to administer any such program selected by the School Board.
