

# Great Math App Available!

Parents,

As part of the i-Ready math adoption, there is a terrific math app available on I-PADS. The students that have played on this program **HAVE LOVED IT!** The student's login information is different than their i-Ready login. It is:

**Username:** first and last initial, lunch number

**Password:** lunch number

**Example:** TC555555  
555555

Door 24 Plus sends students on a mathematical adventure! Students will take a quick assessment and then head into either Snargg Splatt to work on fact fluency or Victor Fixer to work on computational fluency.

## Snargg Splatt

### Fact Fluency Game

If a student is placed into fact fluency, Door 24 sends them to the crazy, colorful world of Snarggles playing their favorite game—Snargg Splatt! To join in on the fun, students will need to work fast to combat the evil Snargg-nado by completing math facts and throwing balls of Splatt at the game board before time runs out!

## Victor Fixer

### Computational Fluency Game

If a student is placed into the computational fluency game, Door 24 will open to reveal that our robot friend, Victor, has gone haywire and needs help. To help get Victor patched up, they will need to repair his circuits which all need to line up with the special number 24. Using problem-solving strategies, students energize Victor to get him up and running again.
